ITS Now announced as 2026 Best Intelligent Transport Systems Knowledge Platform

Winning the title of **Best Intelligent Transport Systems Knowledge Platform 2026** in the **CorporateVision Education and Training Awards** marks an important moment in the journey of **ITS Now**. It is a recognition that speaks directly to the purpose behind the platform, which has always been to make intelligent transport systems clearer, more accessible and more engaging for the people who work with them every day. The award arrives at a time when the sector is evolving at remarkable speed, with new technologies, new expectations and new pressures shaping the future of mobility. In that context, the value of trusted, well-framed knowledge has never been greater.

CorporateVision's Education and Training Awards celebrate organisations that push learning forward. They highlight those who rethink how knowledge is shared, who bring clarity to complex subjects and who help professionals stay ahead in fast-moving fields. The winners span a wide range of disciplines, yet they share a commitment to raising standards and empowering learners. Being

named the leading ITS knowledge platform places ITS Now within that wider community of educators and innovators. It is a reminder that transport technology is no longer a niche interest confined to specialist corners. It is a global conversation, and the way it is communicated matters.

The award feels particularly meaningful because it aligns so closely with the platform's original purpose. ITS Now was created to demystify intelligent transport systems, to bring together engineering, policy, digital infrastructure and mobility innovation in a way that feels coherent and connected. The sector is full of extraordinary work, from AI-driven detection systems and digital twins to connected corridors, multimodal integration and the steady progression towards automation. Yet the stories behind these developments often remain inaccessible to the very people who need to understand them. By translating technical detail into readable, grounded narrative, ITS Now has become a place where practitioners can explore the future of transport without feeling shut out by jargon or complexity. This ethos has been carried forward, not only on the **ITSNow.org** website, but also across the **@ITSNow YouTube Channel** and **ITS Edge Magazine** as well.

The recognition also reflects the breadth of what the platform now covers. ITS Now has grown into a space where event coverage sits alongside deep-dive features, where interviews with innovators complement analysis of regulatory shifts, and where visual storytelling helps bring abstract concepts to life. The aim has always been to show how intelligent transport systems fit into the wider mobility landscape. Whether unpacking the implications of new safety frameworks, exploring the challenges of digital roads or spotlighting the engineers and planners shaping tomorrow's networks, the platform has consistently sought to bring clarity to complexity. That consistency, and the commitment behind it, is what this accolade celebrates.

There is a strong community dimension to this win. ITS Now has never been a solitary voice. It has become a collaborative space where professionals across the sector share insight, experience and perspective. Engineers, technologists, academics, students, suppliers, local authorities and national agencies all contribute to the conversation, whether through formal features or informal engagement. The award acknowledges that collective effort. It highlights how knowledge platforms thrive not only through the content they publish, but through the networks they nurture and the dialogue they enable.

The timing of the award feels significant. Europe's transport systems are undergoing profound transformation, driven by decarbonisation targets, digitalisation, automation and the need for resilient, future-proof infrastructure. Cities are rethinking mobility, national networks are modernising and new technologies are emerging at a pace that challenges even seasoned professionals. In this environment, accessible ITS knowledge is essential. Platforms like ITS Now help bridge the gap between innovation and understanding, supporting practitioners as they navigate decisions that will shape transport for decades to come.

The award also reinforces the importance of storytelling within the sector. Intelligent transport systems can often feel abstract or overly technical, yet they are fundamentally about people. They influence how communities move, how roads operate, how safety is managed and how future networks will evolve. By framing ITS within real-world context, the platform helps readers see the human dimension behind the technology. It encourages a more connected understanding of mobility, one that recognises the interplay between engineering, policy, behaviour and design. This approach has become a defining feature of ITS Now's editorial voice, and it is gratifying to see it recognised.

Winning **Best Intelligent Transport Systems Knowledge Platform 2026** is both a milestone and a motivator. It reinforces the mission to keep raising the bar, to deepen coverage, broaden perspectives and strengthen partnerships. It encourages continued exploration of emerging themes, from autonomous freight and digital twins to sustainable urban mobility and the future of connected corridors. It also highlights the importance of maintaining a clear, engaging narrative style that helps readers navigate the complexity of the sector without losing sight of the bigger picture.

The award is a shared achievement. It belongs to everyone who has contributed to ITS Now, whether through writing, collaboration, conversation or support. Our Supporter Community provides a collective commitment to advancing intelligent transport systems through open, thoughtful and engaging communication. It marks an important chapter in the platform's development and sets a confident foundation for what comes next, thank you.

The sector will continue to evolve, and the need for trusted, accessible ITS knowledge will only grow. ITS Now will continue to play its part by offering insight, clarity and perspective, shaped by the belief that intelligent transport systems are most powerful when they are understood. This award is a welcome recognition of that belief, and a reminder that clear communication can make a genuine difference in a world where mobility is changing faster than ever. **Intelligent Transport Systems, Explained.**

Notes to Editors

ITS Now - Intelligent Transport Systems, explained.

Bio

Alistair Gollop is the Founder of **ITS Now** which exists to promote best practice and professional development within the Intelligent Transport Systems (ITS) sector. **ITS Now** originates resources ranging from videos, reference books and guidance documents through to **ITS Edge Magazine**, informative references and educational content.

Alistair is a recognised Intelligent Transport Systems industry figure with over 30 years in-depth experience, resulting in an extensive specialist knowledge of traffic systems. He is a freelance consultant at **The Alistair Gollop ITS & Traffic Signal Consultancy** (www.AlistairGollop.com) carrying out a wide range of Intelligent Transport Systems and Traffic Signal related consultancy services. A former Technical Principal at Mott MacDonald, he has particular experience in preliminary equipment assessments, due diligence reports, field trials and integration into traffic systems and has a detailed knowledge of specialist technologies and equipment, standards and statutory requirements, along with ancillary issues, such as passive safety and the implications these pose on the design and management of traffic system installations. As well as the UK, Alistair has worked in diverse locations across Europe, South America, Africa, the Middle East, Asia and Australasia. He is the author of the well-respected "Traffic Signals" and "Traffic Control" books, along with "ITS Edge" Magazine and numerous articles for publications. In addition to presenting at conferences, he is a regular panellist and facilitator at events. As the Chair of the Professional Development Portfolio, he sits on the executive board of The Institute of Highway Engineers.
